App Features

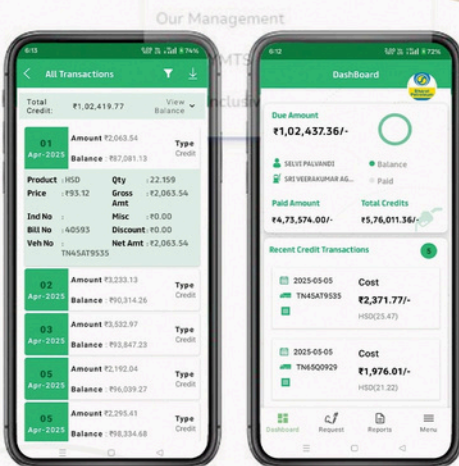

Delivery & Inventory Management

Provides efficient reconciliation between reduction due to nozzle sales and additions from purchases of fuel stocks through dip checking and daily variation charts.

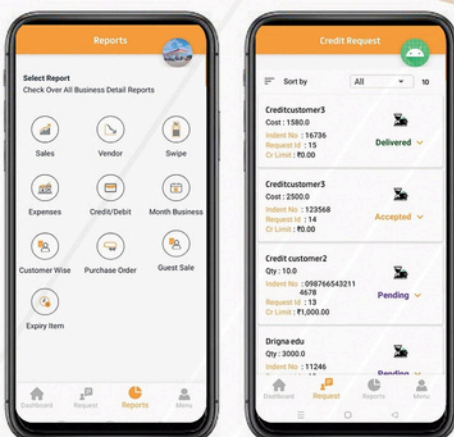

Sales & Purchase Management

The source of revenue of any fuel outlet is the sale of petrol, diesel, lubricants, CNG & LPG if any. Our software helps you to monitor product wise sales, date wise nozzle meter sales position, cash and credit inflow and outflow, day wise purchase details, cashier wise sales position, pump wise sale position and other expenses.

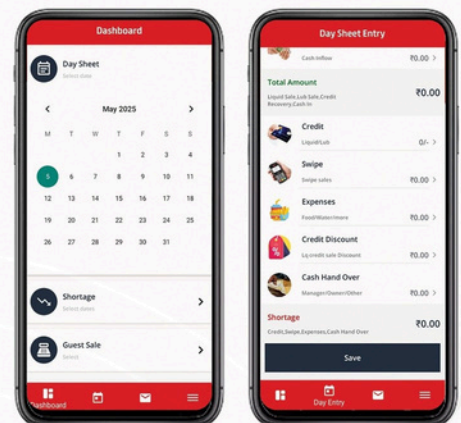

Customer Credit Management

Today substantial sales of any fuel outlet are through credit sales. So, the success of any fuel business depends on timely credit recoveries. Recovering and handling of timely credit sales plays a vital role in petrol pump (bunk) management. Petro Soft is designed to inspect daily credit history of customers based on product and vehicles. Impact of credit on daily sales. Recovery management of credits. Credit dues follow-ups every 15 days, monthly bases.

Discrepancies Management

We help petrol pump managers to avoid discrepancies in financial accounting by providing our specialized feature which will enable them to identify all kinds of embezzlement and offline transactions.

Master Report

Our petrol pump management software is flexible enough to have customized reports as per owner's requirement. Default reports available with software package are daily rate variation, daily business summary, expense reports, daily credit reports, stock register etc.
